Guide

Guide

01

Step By Step

To hard reset a Zebra scanner, simultaneously press and hold the Power button and the Volume Up button until the screen turns off. Release the buttons, and the device will reboot. This action is typically performed when the device becomes unresponsive or freezes.

Detailed Steps:

Step one : Locate the buttons: Identify the Power button and the Volume Up button on your Zebra scanner.

Step Two : Initiate the reset: Simultaneously press and hold both the Power and Volume Up buttons.

Step Three : Release the buttons: Once the screen turns off, indicating the device is powering down, release both buttons.

Step Four : Wait for the reboot: The device will automatically restart, which may take a few seconds.

↓ Press power button

→ Press volume up button

↓ Press power button

→ Press volume up button
